

Yevhen Nebykov

Full Stack Developer

Ghent, Belgium • +32 472263083 • [Website](#) • contact@nebykov.com • [LinkedIn](#) • [Github](#)

PROFILE

Full Stack Developer with strong expertise in Java and Spring, proficient in backend and frontend technologies, including React. Experienced in building scalable web applications and integrating cloud solutions, I have a keen interest in leveraging new technologies for robust architecture.

WORK EXPERIENCE

Xedrum — Software Engineer

Remote • Jun 2025 – Present

- **Built document automation products from the ground up** for a New York-based business insurance company, turning complex internal processes into scalable digital workflows.
- **Helped business teams move from manual document operations to configurable product workflows**, giving non-technical users more control over how processes were executed.
- **Developed a shared UI library used across multiple products**, helping keep interfaces consistent as the ecosystem expanded.

Stack: *Java, React, Next.js, REST API, Nginx, AWS*

Nexa Agency — Full-Stack Engineer & Team Lead

Remote • Mar 2023 – May 2025

- **Built fintech products from early concept to production release**, helping clients turn unclear ideas into working, market-ready platforms.
- **Led the frontend delivery of startup products from zero to launch**, shaping architecture, user flows, technical scope, and implementation priorities.
- **Worked directly with international clients**, turning business discussions into technical solutions.

Stack: *Java, React, Next.js, PostgreSQL, Docker, Nginx*

SoulSync AI — Full-Stack Engineer

Remote • Sep 2022 – Feb 2023

- **Built and deployed a real-time startup platform from scratch**, owning frontend delivery, NestJS backend services, and infrastructure setup.
- **Implemented event-driven real-time architecture with WebSockets**, supporting live chat and notifications.
- **Created a modular NestJS backend architecture** with separated domains for users and real-time events.

Stack: *Java, Spring Boot, NestJS, PostgreSQL, WebSockets, Redis*

EDUCATION

Admiral Makarov National University of Shipbuilding

- *Master's in Computer Science, 2025*
- *Bachelor's in Computer Science, 2024*

Relevant Coursework: Algorithms & Data Structures, Web Technologies, Databases & SQL, Software Architecture, Computer Networks, Operating Systems

CORE SKILLS

Backend & API Development: Java, Spring Boot, Spring Framework, REST API Design, API Integration, Microservices Architecture

Frontend Development: React, Next.js, TypeScript, HTML5, CSS3, Responsive Design

Cloud, DevOps & Infrastructure: AWS, Docker, CI/CD, Nginx, Cloud File Storage, Serverless Functions

UI, Styling & Design Systems: Tailwind CSS, Styled Components, Design Systems, Custom UI Libraries

Java Ecosystem & Testing: JUnit 5, Mockito, Gradle

LANGUAGES

English: B2+ **Dutch:** B1+ **Ukrainian:** C2
